

ENERGY AUDITS

A home energy audit is the first step to assess how much energy your home consumes and to evaluate what measures you can take to make your home more energy efficient.

Maintaining an energy-efficient home can help control your utility costs while providing comfortable living conditions.

An energy auditor can pinpoint where your house is losing energy and give you tips to correct those problems.

To qualify for a free, walk-through residential energy audit, you must be a Conway Corporation residential electric customer and single-family homeowner. Renters must have the written permission of the property owner to participate.

ENERGY SMART IS CONWAY CORPORATION'S ENERGY EFFICIENCY PROGRAM

Energy-efficient homes:

- Increase comfort level
- Lower energy bills
- Help protect the environment
- May provide tax deductions for energy improvements
- 0% interest loans up to \$2,500 available toward recommended improvements

An energy-efficient home can help control your utility costs.

RESIDENTIAL ENERGY AUDIT

Schedule your free energy audit and learn how to make your home more energy-efficient

www.conwaycorp.com

Energy improvements can pay for themselves.

Improved energy efficiency from renovations are the only home improvements that can actually pay you back.

Is your home as energy efficient as it can be?

Unseen problems, such as leaky ducts and poorly sealed doors and windows can result in overworking your air-conditioning unit or heater resulting in higher utility costs.

Schedule your free home energy audit and let Conway Corporation help you learn how to make changes for greater energy efficiency.

ENERGY AUDIT PROGRAM

Conway Corporation now offers a free energy audit to its residential electric customers interested in identifying how much energy their homes consume and what measures may be taken to make their homes more energy efficient. The analysis will show a homeowner problems that may, when corrected, save significant amounts of money over time.

WHAT TO LOOK FOR IN YOUR HOME

WEATHER STRIPPING

By simply using weather stripping on your doors and windows, you can save money on heating and cooling bills each month.

INSULATION

Insulation is one of the fastest and biggest energy-saving measures you can take. Find out how much insulation the US DOE recommends for homes in your area.

ENERGY STAR LABEL

Look for the ENERGY STAR label on home appliances and products. ENERGY STAR products meet strict efficiency guidelines set by the US Environmental Protection Agency and the US Department of Energy.

AUDIT PROCEDURE

A Conway Corporation certified energy professional will perform a walk-through inspection of your home, using a variety of techniques and equipment to determine your energy-efficiency level. The inspection will help you understand the efficiency of your home's heating and cooling systems, look at how sound your windows and doors are, inspect insulation levels, show you ways to conserve electricity, and help identify leaks in your home.
